1. In early August 1955, it was observed that the Central Medical Depot of the KVP was located on "Schoeneicher Plan", about 4 km southwest of Mittenwalde and about 500 meters southeast of the Notte Canal. The depot which covered an area of about 80 meters square, was located on the premises of the former Sunlicht Factory. To the north, along the canal, the depot was secured by a board fence. The main gate was also located on this side. The installation was guarded by factory police which appeared to be unarmed during daytime. The installation had a railroad connection, and the spur track branched off near the Schoeneicher Plan stop on the Mittenwalde - Zossen railroad line.
2. Chief of the depot was a KVP major who wore a cap with a dark-green band and who had dark-green collar patches. No other KVP personnel and only a few civilians were seen at the installation. Medical supplies and medical equipment were procured by the "Medical Administration" of the Ministry of the Interior. The Central Medical Depot at Mittenwalde serves all KVP hospitals.
